The claims should be revised in this case to include not only claims of the type set forth but also claims directed to the filter material or filter component -- see the introduction to the specification.

Our nicotine release agents previously covered should also be studied -- the language employed, including the amount of nicotine normally in cigarettes and the amount of nicotine involved in a ratio of nicotine to weak adsorbent and nicotine to cigarette or to amount of tobacco. Check particularly the claims in our patent (I believe 582-384).
